

Appleton Drive, Yeppoon - Bridge Repair

Project Description:	Four (4) concrete piers under the three-span bridge across Fig Tree Creek on Appleton Drive require repairs and treatment due to the onset of corrosion. The concrete and reinforcing steel will need to be treated to remove the corrosion and to protect the piers from further corrosion.
Reasons for Project:	Remedial work is required to treat and remove the corrosion which has developed in the concrete and reinforcing steel of four concrete bridge piers. This is required to protect the structural integrity of the piers and the bridge.
Benefits of Project:	To protect the structural integrity of the bridge and maximise the life of the structure. As a result, ongoing maintenance costs will be reduced.
Estimated Total Cost:	\$280,000
Commencement Date:	Mid-September 2019
Duration of Project:	Six (6) weeks, subject to weather and ground conditions.
Contact Officer:	Stuart Doak, Manager Infrastructure Projects
Potential Interruptions:	Reduced speed for traffic traversing the bridge while remedial works are being undertaken
