### 3.7 Residential Zone Code

(1) Purpose

- (a) The purpose of the Residential Zone Code is the achievement of the overall outcomes sought for the Residential Zone.
- (b) The overall outcomes sought for the whole of the Residential Zone are:

- (i) Residential areas are characterised by high levels of amenity and provide attractive living environments;
- (ii) Development for residential purposes comprises:
  - (A) a range of residential accommodation styles including long-term and short-term accommodation,
  - (B) long-term and short-term accommodation located appropriately in relation to densities nominated in this code,
  - (C) well designed residential development which is sensitive to climatic conditions and provides for the retention of natural features like creeks, gullies, waterways, coastal zone and vegetation;
  - (D) an open space system including formalisation of recreational and movement opportunities where appropriate;
- (iii) Development is provided with physical and social infrastructure commensurate with the scale and density of development;
- (iv) Non-residential uses locating in a residential area comprise purposes of a local business/community nature which support the enjoyment of residential areas by residents but do not detract from the character and amenity of localities in which they are established;
- (v) Buildings and structures in precincts R1 and R2 are not higher than 12 metres;
- (vi) Buildings and structures in precincts R3 are not higher than 15 metres;
- (vii) Development does not adversely impact on the environmental values of the site and its surroundings.

(2) Elements

- (a) Land use and development
  - (i) Consistent uses

**Specific Outcomes**

- O1 (a) Only uses consistent with the overall outcomes for, and preferred for development within the Residential zone are established in the zone.
- (b) The following uses and use classes are consistent with, and preferred within the Residential zone:
  - (i) Residential Purposes comprising long-term accommodation located as follows:

Accommodation Type	Preferred Locations
Dual occupancy	R1, R2, R3
Dwelling house	R1, R2, R3
- Annexed unit	R1, R2, R3
Multiple dwelling units	R2, R3
Retirement village	On-merit, based on impact assessment

- (ii) Residential Purposes comprising short-term accommodation located as follows

Accommodation Type	Preferred Locations
Accommodation building	R2, R3

**Specific Outcomes**

Bed and breakfast	R2, R3
Caravan park	On-merit, based on impact assessment
Institutional residence	On-merit, based on impact assessment

(iii) Residential Purposes comprising associated activities located as follows:

Accommodation Type	Preferred Locations
Caretaker’s residence	Subservient to a dominant use of premises
Display house or estate office	R1, R2, R3
Home-based business	Subservient to a dwelling unit

O2 Provided the following uses are developed:

- ▶ to be compatible with surrounding development by being of similar scale, intensity and character, and
- ▶ to support preferred uses, and
- ▶ to not adversely affect the amenity of the locality;

they are consistent within the Residential Zone:

- (a) Local utility,
- (b) Shop (not exceeding 100m<sup>2</sup> gross floor area and providing only for convenience shopping needs of residents within its immediate catchment), or
- (c) Special use (being a community hall or centre).

(ii) Inconsistent uses

**Specific Outcomes**

O3 Uses other than:

- ▶ preferred uses nominated in O1, or
- ▶ consistent uses developed to comply with the provisions set out in O2;

do not establish in the Residential zone, do not comply with the overall outcomes sought for the Residential zone and conflict with this code.

(iii) Subdivision design

**Specific Outcomes**

**Self-assessment Solutions**

O4 Reconfigured lots are designed and developed with:	S4	(a)	Other than reconfiguring for a Community Titles Scheme, lots are developed with areas and dimensions that comply with the design standards set out in Table S3 below.
		(b)	For reconfiguring involving a Community Titles Scheme:
		(i)	the number of lots on the Standard Format Plan comprising the Community Titles Scheme does not exceed the number of lots complying with the design standards set out in the Table S3 below; unless,
		(ii)	the number of lots on the

Standard Format Plan accords with the density of development given by a prior related Development Permit for Material Change of Use.

**Table S3 – Design Standards for Subdivision in the Residential Zone**

Precinct	Minimum Lot Size (Square Metres -m <sup>2</sup> )	Minimum Frontage (Metres - m)
R1 & R2	(a) 700m <sup>2</sup> , unless (b) applies (b) If subsequent to a Development Permit for a Material Change of Use for an integrated house and land project <sup>56</sup> : 300m <sup>2</sup>	▶ 20m ▶ 10m
R3	(c) 800m <sup>2</sup> , unless (d) applies (d) If subsequent to a Development Permit for a Material Change of Use for an integrated house and land project <sup>51</sup> : 300m <sup>2</sup>	▶ 25m ▶ 10m

(iv) Density

Specific Outcomes	Self-assessment Solutions						
O5 Density of residential development is compatible with local amenity expressed by the outcomes sought for the Residential Zone.	S5 (a) No more than one (1) Dwelling house is constructed on any lot.  (b) Multi-unit residential purposes do not exceed the following maximum densities:						
	<table border="1"> <thead> <tr> <th>Residential Precinct</th> <th>Maximum Density<sup>57</sup></th> </tr> </thead> <tbody> <tr> <td>R2</td> <td>125 persons/hectare</td> </tr> <tr> <td>R3</td> <td>350 person/hectare</td> </tr> </tbody> </table>	Residential Precinct	Maximum Density <sup>57</sup>	R2	125 persons/hectare	R3	350 person/hectare
Residential Precinct	Maximum Density <sup>57</sup>						
R2	125 persons/hectare						
R3	350 person/hectare						

<sup>56</sup> Integrated house and land project refers to development comprising both the subdivision of land and constructions of small lot housing as an integrated project starting with a large parcel and ending with completed small lot housing.

<sup>57</sup> Calculation of the density for multi-unit development will be in accordance with the parameters set out in the definition of *maximum density* [refer Schedule 1, Division 2].

(v) Character and Amenity

Specific Outcomes	Self-assessment Solutions
-------------------	---------------------------

- O6 Uses and works are located, designed and operated to minimise adverse impacts on:
- ▶ existing environmental conditions relating to air, water and soil,
  - ▶ the amenity of adjacent properties and public spaces,
  - ▶ visual quality of landscapes in terms of:
    - reducing ribbon development and sprawl,
    - loss of green break separations,
  - ▶ obstructing significant local and distant views of prominent natural features and landmarks, and
  - ▶ the health and safety of people using the premises and adjacent premises.

- S6 (a) Non-residential purposes are buffered from adjoining properties used for residential purposes by provision of:
- (i) 1.8 metre high solid screen fence along common side and rear boundaries;
  - (ii) 6 metre wide landscaped area along the main road frontage;
  - (iii) 3 metre wide landscaped area adjacent to other road frontages and side and rear boundaries common with premises used for residential purposes.
- (b) Night lighting is designed, constructed and operated in accordance with *Australian Standard AS4282 – Control of the obtrusive effects of outdoor lighting*.
- (c) Non-residential purposes do not generate levels of noise that exceed levels interpreted under the *Environmental Protection (Noise) Policy* provisions, as ‘unreasonable’, or the following whichever is the lesser:

Period	Noise Level at Noise Sensitive Place
0700 – 2000	Background noise level plus 5 dB(A)
2000 – 0700	Background noise level plus 3 dB(A)

Measured as the adjusted maximum sound pressure level  $L_{max\ adj\ T}$

- (d) Land proposed for reconfiguring and subsequent use for residential purposes is buffered along common boundaries with land included in the Rural Zone, Business Zone or Industry Zone by provision of:
- (i) minimum 1.8 metre high solid fence along common side and rear boundaries; and
  - (ii) minimum 3 metre wide landscaped area adjacent to boundaries common with premises used for non-residential purposes.

Specific Outcomes	Self-assessment Solutions
<p>O8 For a noise sensitive place, activities are laid out and buildings are designed and constructed to mitigate to a level, that does not unreasonably adversely affect the health and safety of people using premises, the effects of noise from:</p> <ul style="list-style-type: none"> <li>▶ Traffic on major roads (including State controlled roads); or</li> <li>▶ Operations within railway corridors.</li> </ul>	<p>(ii) despite any Self-assessment Solution specified in a Specific Use Code, if abutting land within the Rural Zone, Business Zone or Industry Zone, a minimum 3 metres wide landscaped area is provided along the boundary with such land which is suitable for deep planting<sup>58</sup>.</p> <p>S8 (a) For a State controlled road:</p> <p>(i) Windows facing the road are double glazed; and</p> <p>(ii) Buildings used for residential purposes are laid out with:</p> <ul style="list-style-type: none"> <li>– bedrooms and living rooms located on the opposite side to the road; and</li> <li>– kitchens, bathrooms, garages, and rooms for recreation, laundry, utility, storage or the like are on the same side as the road to assist with buffering noise to living and sleeping areas.</li> </ul> <p>(b) For a State controlled railway corridor:</p> <p>(i) Building are designed and constructed to reduce the effects of noise by:</p> <ul style="list-style-type: none"> <li>– locating living and bedroom area on the opposite side to the rail corridor; or</li> <li>– locating activity areas in non-residential noise sensitive places on the opposite side to the rail corridor; and</li> <li>– insulating walls and rooves with sound dampening material;</li> <li>– double-glazing transparent openings on the same side as the rail corridor and installing complimentary mechanical ventilation systems; and</li> <li>– eliminating openings on the same side as the rail corridor; and</li> </ul>

<sup>58</sup> Refer to Schedule 1, Division 2 for the definition of ‘deep planting’.

Specific Outcomes	Self-assessment Solutions
	(ii) Noise attenuation barriers/devices including planted earth mounds (minimum 1.5 metres high) and solid fencing (minimum 1.8 metres high) are incorporated parallel to and within 6 metres the rail corridor for its full length.

(vi) Cultural Heritage Values

Specific Outcomes
O9 Cultural heritage values associated with the landscape features of a site and its surroundings or relics of past activities found during development of the site are respected and are not subjected to changes that would significantly reduce the capacity to appreciate those areas, places and sites, their character or the memories or history they represent, in terms of visual detracting, public accessibility or physical change, damage or removal.

(vii) Flood Immunity<sup>59</sup>

Specific Outcomes	Self-assessable Solutions
O10 Development is immune to flood events which result in unacceptable risk to health and safety or unacceptable risk of property damage.	S10 Land on which buildings and structures associated with development nominated in Column 1 of Schedule 7 will be constructed has immunity from a flood event of at least the annual exceedence probability specified in Column 2 of Schedule 7 for the development.

(viii) Community safety

Specific Outcomes	Self-assessment Solutions
O11 Personal safety and property security are optimised through the design of buildings and spaces incorporating: <ul style="list-style-type: none"> <li>▶ opportunities for surveillance;</li> <li>▶ clear definition of boundaries between private and public spaces; and</li> <li>▶ robust construction materials.</li> </ul>	S11 Development is designed in accordance with the standards nominated in Schedule 5 to this planning scheme.

<sup>59</sup> The flood immunity parameters listed in Schedule 7 include consideration of storm tide hazard

(ix) Vehicle parking and movement

Specific Outcomes		Self-assessment Solutions	
O12	<p>Development is provided with an on-site parking and movement system designed and constructed to:</p> <ul style="list-style-type: none"> <li>▶ be integrated with the site layout including:                             <ul style="list-style-type: none"> <li>– direct access to a road providing a level of service required to accommodate traffic generated by the use; and</li> <li>– appropriately designed footpath crossovers; and</li> <li>– provision for safe pedestrian movement between public footpath and facility entry points; and</li> </ul> </li> <li>▶ accommodate all modes of transport (including motor vehicles and bicycles) generated by the use; and</li> <li>▶ facilitate non-discriminatory accessibility; and</li> <li>▶ provide for safe and efficient loading and unloading of goods; and</li> <li>▶ allow for vehicle queuing necessary for the use; and</li> <li>▶ provide for passenger set down/pick up necessary for the use; and</li> <li>▶ facilitate public access to the foreshore and riparian open space networks.</li> </ul>	S12	<p>(a) Parking is provided on-site:</p> <ul style="list-style-type: none"> <li>(i) at the rate nominated in Division 1 of Schedule 2 to this planning scheme; and</li> <li>(ii) laid out, constructed and maintained in accordance with the standards nominated in Division 2 of Schedule 2 to this planning scheme.</li> </ul> <p>(b) Loading/unloading facilities are laid out, constructed and maintained in accordance with the standards nominated in Division 2 of Schedule 2 to this planning scheme.</p> <p>(c) Vehicle queuing and set-down/pick-up areas are laid out, constructed and maintained in accordance with the standards nominated in Division 2 of Schedule 2 to this planning scheme.</p> <p>(d) Vehicular access is designed and constructed in accordance with the standards nominated in Division 2 of Schedule 4 to this planning scheme.</p> <p>(e) Bicycle and pedestrian access integrated with site design to facilitate both on-site movement and connection to the Shire bicycle and pedestrian networks in accordance with the standards nominated in Division 2 of Schedule 4 to this planning scheme.</p>

(b) Infrastructure

Specific Outcomes		Self-assessment Solutions	
O13	<p>Water supply, sewerage, drainage, roads, power and communications are provided to meet the appropriate standards of service and construction at least whole-of-life cost, which:</p> <ul style="list-style-type: none"> <li>▶ comprise components and materials that are:                             <ul style="list-style-type: none"> <li>– readily accessible and available; and</li> <li>– robust and reliable in terms of operational life and purpose; and</li> <li>– easily maintained without unnecessarily requiring specialist expertise or equipment; and</li> </ul> </li> <li>▶ are integrated with the design, construction and operation of existing systems and facilitate orderly provision of future systems.</li> </ul>	S13	<p>Water supply, sewerage, drainage, roads, power and communications are:</p> <ul style="list-style-type: none"> <li>(a) provided to meet the standard of service nominated in Division 1 of Schedule 4 to this planning scheme, and</li> <li>(b) constructed in accordance with standards nominated in Division 2 of Schedule 4 to this planning scheme.</li> </ul>
